

IELTS Speaking Topic- Bicycles

**Q.1- How popular are bicycles in your hometown? Why?**

**Ans-** Bicycles are, in my opinion, relatively rare in my hometown. It was pretty popular when I was a kid, and I've seen many people riding bikes to get around. At the moment, the majority of people commuted to and from their workplaces on bicycles. However, motorized cars have grown in popularity in recent years, and this movement has reduced the use of bicycles. However, the fact that more young people already ride bikes is a positive indication.

**Q.2- How often do you ride a bicycle? [Why/Why not?]**

**Ans-** To be honest, I hardly ever ride a bicycle these days. Busy lives, faster-motorized cars, and apathy toward physical activity have made us less likely to ride a bike. I ride my bike once in a while, just for fun and not for travel. I choose to ride in a car rather than a bicycle because the former is quicker and more convenient.

**Q.3- Do you think that bicycles are suitable for all age groups? [Why/Why not?]**

**Ans:** Bicycles, in my opinion, are appropriate for people of all ages. Bikes are inexpensive, need little upkeep, and are suitable for the environment and our wellbeing. Kids, teens, and senior citizens can easily ride it because it does not require much physical effort. Riding a bicycle has many health advantages, which is why people of all ages should see it as their primary mode of transportation.

**Q. 4- What are the advantages of a bicycle compared to a car? [Why?]**

**Ans-** Except for the fact that an automobile is quicker, bicycles have much more advantages than automobiles. The most crucial benefit of bicycling is that it keeps us safe. Bicycles are environmentally safe and do not pollute the climate. They are inexpensive and do not necessitate costly repairs or utilities. Bicycles, unlike cars, do not need a more extensive parking area. Bicycles may be an ideal substitute for motorized vehicles in our town, given the environmental implications.
