

IELTS WRITING TASK 2

Q-The government has announced that it plans to build a new university.

-Some people think that your community would be an excellent place to locate the university.

-Compare the advantages and disadvantages of establishing a new university in your community.

-Use specific details in your discussion.

Model answer:

I believe that establishing a new institution in my community is a fantastic idea. However, I think it is a contentious issue if constructing a new institution will benefit our community. This essay will examine the benefits and drawbacks of this topic and my thoughts on creating a unique institution in my community.

On the one hand, constructing a new institution in my community has numerous advantages. To begin with, more construction equals additional job openings. It would be beneficial to my town because many people spend a significant amount of time commuting to work every day because they cannot find work in our area. Second, attending a new university provides a fantastic opportunity to meet new people, which I welcome. Third, our community will be home to a large number of students. Finally, if a new university is created in my community, there is a strong possibility that I will enroll. I think it's excellent because it's close to my house and I won't have to relocate to another area of town. Another essential feature is that members of my neighborhood will have the opportunity to use a new university's new libraries and facilities. Some people, for example, can enroll in courses and classes there.

However, there are significant drawbacks to establishing a new university. Noise, traffic delays, and various types of pollution are all associated with new development. Aside from these drawbacks, many young people in our community can increase noise, particularly in the evenings.

To summarise, I believe that, despite the potential for a few drawbacks, I would support the government's decision to build a new university in my city. A new university, in my opinion, will increase the number of young people who receive higher education and gain more information and experience, which will help them flourish in today's society.
