

IELTS WRITING TASK 2

Q-Do you agree or disagree with the following statement?

Children should begin learning a foreign language as soon as they start school.

-Use specific reasons and examples to support your opinion.

Model answer:

The most effective way of communication is language. Unfortunately, speaking one language is insufficient to communicate with the outside world in the present globalization period. I am a firm believer in children starting to learn a foreign language as soon as they enter school. They learn new words faster, improve their hearing skills to interpret new words, and become more familiar with a foreign language. I'll give some grounds to support my position in the following paragraphs.

First and foremost, if one wants to see results quickly, one must begin sooner. As a result, the earlier youngsters start to acquire a new language, the better. According to scientists, a youngster does not mix two languages but instead learns them more successfully.

Second, while speaking in a foreign language, adults are often terrified of making mistakes. One of the most significant hurdles to a person's ability to talk freely is fear. On the other hand, children are unafraid of committing grammatical errors since they repeat words and sentences after hearing them. Additionally, children have a better chance of overcoming an accent. They become more accustomed to precise pronunciation and have a greater sense of a language's melody.

To summarise, children should start studying a foreign language at a young age. It has numerous advantages, including excellent pronunciation. It also aids a child's development and acquisition of knowledge that is beneficial in the long term.
