

IELTS SPEAKING PART 1

Speaking Part 1

1 Do you like birds? OR How do you feel about birds?

I am interested in nature, so I enjoy learning about different plant species, animal kingdoms, and bird species. They are truly fascinating creatures that come in various shapes and sizes. One of my favorite pastimes is bird watching.

2 Have you seen many kinds of birds?

On the other hand, birds are a rare sight in the city. So far, most of what I've seen about birds has come from documentaries about the great outdoors. I've seen some common breeds in person, such as pigeons, but nothing too exotic.

3. How do people in your country feel about birds?

Overall, they **are not very into** birds. Only older adults are **fond of** keeping birds. Most people only like to eat them, especially **game birds** like pheasants. People in remote areas often hunt for birds in the wild and roast them over an open fire. They are considered a **delicacy** where I come from.

4 Have you seen many different kinds of birds?

I have only seen a few; I am not a bird watcher. The ones I have seen are pretty common, like pigeons and sparrows. I haven't sighted any exotic breeds.
