

## IELTS SPEAKING PART 1

### Speaking Part 1

#### **1 What natural sound(s) do you like (the most)? (Why?)**

*That's an intriguing question. I'm a morning person, and nothing soothes me more than the sound of birds chirping (the noise birds make) in the morning. That sound is so fresh and innocent to me, and it immediately puts me at ease. Even though I now live in a big city, it transports me back to my childhood in the country.*

#### **2 What sounds remind you of your childhood?**

I'd describe it as the sound of '90s pop music. My family was huge music fans, so we would always drive around my small town blasting 90's pop (at total volume), including Britney Spears, Counting Crows, Nsync, and others. Although this was not my parents' favorite music, they would always play it for my sister and me. As a result, we have many family memories of singing along to these memorable (a song you remember) hits. As a result, I consider these songs to be my childhood soundtrack (movie pieces).

#### **3 What sounds do you dislike? (Why?)**

The sound of honking horns is my biggest pet peeve (something that irritates you). They irritate me! This noise is almost unbearable (impossible to tolerate), owing to its loud, unexpected (unexpected) sound, which immediately disturbs my peace. Furthermore, it is usually the sound of a frustrated or angry driver which adds to the annoyance.

#### **4 Does your school have any quiet places for studying?**

Because my university's library strictly enforces (makes you follow the laws exactly) the silence policy, it creates a quiet, tranquil environment for students to study in peace.

Although she can be a pain (annoying) at times, I appreciate that Ms. Schauerman takes her job seriously. If someone speaks, she will walk over and say, "hush! It's a library!" in a stern (sharp and severe) tone of voice. Furthermore, the library is outfitted with beanbags, desks, a computer lab, and conference-style desks, making it a pleasant place to work.

#### **5 What (kinds of) music do you like the most?**

That's a difficult question because I enjoy a wide range of music, but I'd have to say (decide) 90's music. I prefer this type of music because it makes me nostalgic (I miss the past). After all, I was born in the 1990s (someone born in the 1990s). I prefer pop, alternative, and punk rock music from the last decade. I believe I am most fond of (really like) this era (period) because of the music's light-hearted (not deep or sad meaning), easy-listening style.

#### **6 What are some places where there is a lot of noise?**

It's nearly impossible for me to escape the noise because I come from a bustling (busy) city. Street vendors, honking horns, motorbikes, barking dogs, and construction sites continuously fill the streets. The old town is the noisiest part of the city, as it has a higher concentration (high numbers in one area) of street sellers, more new construction projects, and more traffic passing through, as it is the liveliest part of the city.

#### **7 What type of noise do you come across in your daily life?**

What a commotion (mix of sounds)! It ranges from screaming matches (fights) between partners and families in my apartment to street vendors shouting out their wares for all to hear, motorbikes speeding by, and blaring horns. The sound of horns is the one that most defines my city. Horns are natural to fill the streets, given the city's heavy traffic and lack of clearly defined lanes.

#### **8 Do you mind noises? (Do any noises bother you?)**

Because I'm a light sleeper (I wake up quickly), the noises around me irritate me. The sound of a barking dog, on the other hand, is the most aggravating (annoying). It's just so shrill (it gets stuck in your head)! It's alarming and makes it difficult for me to concentrate on

anything else. Furthermore, it saddens me to hear that a dog is in such distress that it must bark in such away.
